

# PRTC Hosted Unified Communications

PRTC Hosted Unified Communications is a fully managed, enterprise-grade phone system that utilizes the latest cloud-based technology to connect your business without the high costs of a traditional premise-based phone system. PRTC Hosted UC provides a broad range of local and cloud-based features and service options that are designed to help your business communicate reliably without a large capital investment or the worry of maintenance fees.

## Feature-Rich Solutions

Benefit from a feature-rich platform including voicemail to email, mobility features, auto-attendant, and music on hold, just to name a few!

## Affordable Costs

Businesses utilizing hosted solutions never have to worry about software updates or hardware maintenance. This key perk enables the possibility for organizations to eliminate costs but enjoy the benefits of using up-to-date, feature-rich technology.

## Increased Flexibility

Optimal for businesses of all sizes, hosted solutions enable smaller organizations to have the same resources as larger ones. There are no costly layouts, additional equipment purchases, or complicated start-up procedures.

## Low Up-front Costs

With no need for expensive on-premise hardware, our systems require less up-front capital dollars when compared to a traditional phone system.

## Seamless Platform

Connect multiple locations and remote and mobile workers with a single feature-rich platform.

## Learn how to boost your team's productivity today

Call Us at **843-538-7253** or email [busdirect@prtc.us](mailto:busdirect@prtc.us) for more information on Hosted Unified Communications.

## Solution for Remote Users

Regardless of where your users are while working remotely — satellite locations, their homes, a client's office, etc. — a hosted solution provides them access to the same phone system as their coworkers. Remote workers simply connect a preprogrammed VoIP phone to a broadband/cable Internet connection, allowing you to manage your remote employees, increase their productivity while reducing travel and office expenses.
